

ABOUT THE FUND

Investment Objective:

The CATALYST SA PROPERTY EQUITY PRESIDENT FUND is an actively managed portfolio, which has a total return objective and seeks to offer investors a return in excess of South African Domestic property equity markets. The portfolio has a medium to long-term investment horizon.

Investment Policy	In order to achieve this investment objective the securities normally to be included in the portfolio will primarily consist of property shares, REITs, financial instruments, assets in liquid form and non-equity securities which are considered consistent with the portfolio's primary objective and that the Act or the Registrar may allow from time to time, all to be acquired at fair market value.

MONTHLY COMMENTARY

The SA Listed Property Index (SAPY) recorded a total return of 1.99% for the month of October, with the historic yield of the SAPY ending the month at 6.77%. The yield-to-maturity (YTM) on the South African 10 yr government bond (R186) weakened by 54bps, ending the month at 9.09% (8.55% -30 September 2017). SA Equities recorded the highest total return (6.26%) for the month of October, followed by SA Listed Property (1.99%), SA Cash (0.62%) and SA Bonds (-2.28%). For the rolling 12-month period SA Equities continues to outperform other asset classes recording a total return of 20.11% with SA Listed property recording the second highest total return of 11.13% over the same period.

The fund delivered a gross of fees return of 12.17% for the rolling 12 months, ahead of the benchmark return of 11.15%. As at 31 October 2017, the fund's offshore allocation was approximately 46% on a see-through basis. The current forward yield of the SAPY is 7.3%, with SA-centric companies trading at much higher yields; many in excess of the RSA Long Term Government Bond. Earnings season is fully underway & it is increasingly becoming evident that local REITs have been affected by the lacklustre economic environment. We see the potential for negative earnings surprises in some of the listed funds. Some of the methods used to enhance the bottom line are non-recurring in nature which has increasing forecast risk, artificially inflating the base period and reducing the quality of earnings across the sector. Despite the weak local fundamentals, short to medium term growth in distributions is expected to be above inflation for the SAPY on a market capitalisation weighted basis due to the high growth from offshore companies.

Asset Allocation

Funds Sectoral Allocations as at 31 October 2017

Term	Meaning
Annualised performance	Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.
Highest & Lowest return	The highest and lowest returns for any 1 year over the period since inception have been shown.
NAV	The net asset value represents the assets of a Fund less its liabilities.
Co-named Collective Investment Scheme	A portfolio approved and branded in the name of both the manager (Prescient Management Company) and the financial services provider (Catalyst Fund Managers) and where the financial services provider undertakes the function of discretionary financial services in relation to the assets of the portfolio.
Income Distribution	The interest and/or dividend income that is generated by the underlying investments in the Fund and that is declared and distributed to investors in the Fund periodically.

DISCLAIMER:

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.catalyst.co.za.
