<b>Investment Advisor on underlying fund</b>	Catalyst Fund Managers Global (Pty) Ltd	
<b>ISIN - Feeder B class</b>	ZAE000164752	

### MONTHLY COMMENTARY

Our benchmark, the FTSE EPRA/NAREIT Developed Net Rental Index, recorded a net total USD return of -8.28% in February. The best performing listed real estate market was Canada, which recorded a total USD return of -5.08% for the month. The UK recorded the lowest total USD return of -11.76%.

Amid fears of the coronavirus spreading worldwide and the resulting slowdown on global economic growth, we thought it topical to consider the potential influence on the listed property sector. During the month, a risk-off environment and high degree of uncertainty negatively impacted global equity markets and real estate was no exception. The overall economic impact will depend on the extent of the virus spread and the ensuing length and magnitude of disruptions to economic activity.

Various real estate sub-sectors should react differently and to varying extents. The retail sector is anticipated to be one of the hardest hit on the back of reduced consumption as consumers avoid crowded places, including shopping centres and other busy retail locations. The modern darlings of retail, namely restaurants and entertainment venues, together with other discretionary spending destinations are likely to be adversely impacted. Certain retail locations may be temporarily closed, affecting the financial health of retailers and shopping destinations alike. Retailers may be affected by the slowdown in global manufacturing and input costs could begin to rise as retailers attempt to diversify their supply sources, particularly outside of China. All of this could ultimately impact retailer affordability and their ability to pay rents. Rental reductions and concessions could ensue.

Certain types of industrial properties will be impacted from a reduction in manufacturing activity and a disruption to global supply chains. Longer term, urban logistics assets should benefit from a structural increase in e-commerce and the demand for last mile delivery. The hospitality industry and hotel sector will be burdened by a reduction in travel, both locally and globally, as countries continue to impose travel restrictions and individuals and corporates avoid travel plans. In a similar vein, tourism-related retail will suffer.

Healthcare should react differently depending on the type of asset. Senior housing and skilled nursing will feel the brunt of aging populations being most impacted by the virus, while medical office buildings could benefit from increased use of doctors and medical professionals. Lab space landlords could benefit from a heightened need to find a suitable cure. Office space could see decreased demand as employees spend more time working from home and avoid social contact in order to limit the spread of the virus. Office properties with sustainability and wellness features (ventilation, air quality and other environmental features) should benefit on a relative basis.

Residential sectors are considered defensive in such an environment for the obvious reason that we all need a place to live and sleep. More affordable housing supplies, such as that of manufactured housing, should be resilient in the event of a downturn and the resulting impact on job and wage growth.

The estimated forward FAD (Funds Available for Distribution) yield for the sector is 4.96%. Relative to corporate bonds the sector looks attractively priced on both implied cap rates and expected total return spreads. Within the real estate universe, more attractively priced opportunities exist in specific real estate sectors and stocks, providing opportunities for astute active managers.

### INVESTMENT OBJECTIVE

This specialist fund offers real estate focus, with global diversification. The real estate focus is through real estate securities with a specific bias towards stocks classified as investors, as opposed to developers. The investor classification is defined as those stocks that have 70% or more of their income derived from rent. The guiding principle is the ownership of real estate assets, primarily to earn rental related income streams which provide a stable underpin to long term returns. Global diversification is across geographic regions, currencies, countries and real estate types. The intention is to provide an attractive risk-adjusted return to form part of a multi asset class portfolio. The fund benchmark is the FTSE EPRA/NAREIT Developed Rental Index, which comprises of stocks in the following regions: United States, Canada, UK, Europe, Japan, Hong Kong, Singapore, Australia and New Zealand.

Best risk adjusted 5 year return (SA-Domiciled) Global RE Fund 2019

## MINIMUM DISCLOSURE DOCUMENT

TERM	MEANING
Annualised performance	Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.
Highest & Lowest return	The highest and lowest returns for any 1 year over the period since inception have been shown.
NAV	The net asset value represents the assets of a Fund less its liabilities.
Co-named Collective Investment Scheme	A portfolio approved and branded in the name of both the manager (Prescient Management Company) and the financial services provider (Catalyst Fund Managers) and where the financial services provider undertakes the function of discretionary financial services in relation to the assets of the portfolio.
Income Distribution	The interest and/or dividend income that is generated by the underlying investments in the Fund and that is declared and distributed to investors in the Fund periodically.

### SPECIFIC FUND RISK

Foreign Investment risk:	Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.
Property risk:	Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.
Currency exchange risk:	Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.
Geographic / Sector risk:	For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.
Equity investment risk:	Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

### DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. The Catalyst Global Real Estate RE Prescient Feeder Fund has a Total Expense Ratio of 1.45%. For the period from 1 January 2019 to 31 December 2019, 1.45% of the average Net Asset Value of the portfolio was incurred as charges, levies, fees related to the management of the portfolio. A Feeder Fund is a portfolio that invests in a single portfolio of a collective investment scheme which levies its own charges and which could result in a higher fee structure for the feeder fund. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to [www.catalyst.co.za](http://www.catalyst.co.za).
