31 March 2020	5.70 cents per unit	60.93

MONTHLY COMMENTARY

The SA Listed Property Index (SAPY) and the All Property Index (ALPI) recorded total returns of -0.76% and -0.53% respectively for the month of May, with the historic yield of the SAPY ending the month at 10.70%. The yield-to-maturity (YTM) on the Long-Term South African government bond (RLRS) re-rated by 120 bps to end the month at 8.95% (10.15% - 30 April 2020).

SA Listed Property lost some of the gains it recorded in the previous month with a total return of -0.76%. SA Bonds was the best performing asset class (7.01%) followed by SA Cash (0.47%), SA Equities (0.31%) and SA Listed Property (-0.76%). SA Listed Property (SAPY) continues to underperform other asset classes on a rolling 12-month period (-45.92%), with SA Cash outperforming with returns of (6.99%), followed by SA Bonds (6.39%) and SA Equities (-5.96%).

Globally, the FTSE EPRA/NAREIT Developed Rental Net Total Return Index, recorded a net total USD return of 0.63% for the month of May. The best performing global listed real estate market was Singapore, which recorded a total USD return of 6.85% for the month. Hong Kong recorded the lowest total USD return of -15.89%, on the back of renewed political uncertainty.

The month of May saw publication of 1st quarter earnings for many companies, where the focus was heavily skewed towards rent collections and the impact of COVID-19. Some corporate activity also occurred during the month, most notably Capital & Counties confirming they will take a stake of up to 26% in fellow London West End mixed use landlord, Shaftsbury; and Lighthouse acquiring a meaningful stake in UK value-retail landlord, Hammerson. Relative to corporate bonds the sector looks attractively priced on both implied cap rates and expected total return spreads. Within the real estate universe, more attractively priced opportunities exist in specific real estate sectors and stocks, providing opportunities for astute active managers.

The Flexible Fund's offshore allocation is approximately 46.95% on a see-through basis. We encourage management teams that are of the view that the going concern ability of the company could be compromised to retain distributions and/or introduce a pay-out ratio that would allow retention of a portion of the distribution to ensure the liquidity and solvency requirements are met. We do not support companies withholding dividends despite liquidity & solvency requirements being met. We, thus, encourage deferrals of distributions where necessary. We are of the view that dividends/distributions, to the extent possible, should be declared & paid subject to satisfying liquidity & solvency requirements. It is vital for management teams to balance the long-term interest of shareholders relative to fulfilling the needs of many investors depending on the dividend for retirement income.

SPECIFIC FUND RISK

Foreign Investment risk:	Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.
Interest rate risk:	The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.
Property risk:	Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.
Currency exchange risk:	Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.
Geographic / Sector risk:	For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.
Equity investment risk:	Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

CATALYST FLEXIBLE PROPERTY PRESCIENT FUND

MINIMUM DISCLOSURE DOCUMENT

TERM	MEANING
Annualised performance	Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.
Highest & Lowest return	The highest and lowest returns for any 1 year over the period since inception have been shown.
NAV	The net asset value represents the assets of a Fund less its liabilities.
Co-named Collective Investment Scheme	A portfolio approved and branded in the name of both the manager (Prescient Management Company) and the financial services provider (Catalyst Fund Managers) and where the financial services provider undertakes the function of discretionary financial services in relation to the assets of the portfolio.
Income Distribution	The interest and/or dividend income that is generated by the underlying investments in the Fund and that is declared and distributed to investors in the Fund periodically.

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.catalyst.co.za.
